206. Reverse Linked List

Reverse a singly linked list.

```java
class Solution {
    public ListNode reverseList(ListNode head) {

        ListNode prev = null;
        while(head != null) {
            ListNode temp = head.next;
            head.next = prev;
            prev = head;
            head = temp;
        }

        return prev;
    }
}
```
